## Overview

In 5th grade math, students learn about fractions, decimals, and percentages, and basic geometry concepts such as area, perimeter, and volume. They also learn basic algebraic concepts, including variables and equations, and problem-solving skills. Additionally, students learn about graphing and data analysis like interpreting line plots.

Make math exciting with my curriculum, unit & lesson plans covering every 5th grade CCSS standard.

In each lesson, students master these topics with artistic and interactive guided notes, and gain practice with such as a doodle and color-by-number activity and a maze worksheet. Each lesson culminates with a real-life application of math, making each topic feel deeply relevant.

If you're looking to make math more engaging – in a way that's Common Core-aligned – this is the curriculum plan for you.
